Lab 5

In Postman, test a REST API to demonstrate _Authorization_ by generating a _'Bearer Token'_ to access a REST API

Step 1: Post Request and create a environment

URL : https://reqres.in

Endpoint : /api/login

Body:

```
{
    "email": "eve.holt@reqres.in",
    "password": "cityslicka"
}
```

Post-response script :

```
pm.test("Status code is 200", function () {
    pm.response.to.have.status(200);
});

pm.environment.set("bearerToken", pm.response.json().token);
```

Step 2: Get Request

URL : https://reqres.in

Endpoint : /api/login

Post-Response Script:

```
var token = pm.environment.get("bearerToken");
console.log("The stored token is: " + token);
```
